Part B. CV SUMMARY (max. 3500 characters, including spaces)

It is not an easy task to summarize thirty years of academic activity. In my case, I would like to highlight two elements of my career: on one hand, a balanced dedication to research, to teach and to assume institutional responsibilities and, on the other hand, some experience in leading teams and projects.

I'm Professor of the Faculty of Library and Information Science, University of Barcelona. I have degrees in Philosophy, in Library and Information Science and a PhD in Information Science (Journalism). This transversality is also present in my current research lines which are now focused in open access and open science but in the past was technology for information services.

I am the author of twelve books, more than 100 journal articles, 20 book chapters and more than 100 presentations in Spanish and international conferences (section C1). I have supervised 15 doctoral theses with relevant publications derived from them (with no space to detail them).

I have participated continuously in competitive research projects since 1991 and I have been principal investigator of four projects of the Spanish Research Plan from 2004 to the present. Currently I'm the director of Centre of Research on Information, Communication and Culture (CRICC) and also the leader of a research project on open science in Spain and a Consolidated Research Group "Culture and Digital Contents" (detailed in C2).

I am a scientific editor, member of editorial boards and reviewer of several academic journals (details in C6). I've collaborated with evaluation agencies of Catalonia (AGAUR), Spain (AEI, ANEP, ANECA, ACSUCYL), Italy (ANVUR) and Greece (HQAA) (C7). Finally, I have continuously carried out several academic positions in the department, the Faculty and the University as well (C5).
